

INVITES YOU AND A GUEST TO A SPECIAL ADVANCE SCREENING!

Based on the novel by Guillermo Martinez, *The Oxford Murders* stars Elijah Wood as Martin, an American grad student who comes to Oxford so that he can study with renowned professor Arthur Seldom (John Hurt). However, Seldom actually turns out to be a bit difficult and he belittles Martin in front of a lecture audience.

However, Martin and Seldom find themselves thrown together when they stumble upon the murder of Martin's landlady (Anna Massey) and discover that the murderer left a note with mathematical symbols on it. It quickly becomes clear that hers is the first in a series of increasingly bizarre murders, with each victim's corpse marked by strange symbols. Professor and student join forces to try and crack the code, setting into motion an elaborate game with the killer with ever-increasing stakes. As Martin gets closer to the facts, he grows increasingly unhinged from his grasp on the world around him.
